

Module Description: Community Nursing Concept (21R01121302)

Module designation	Course Module
Semester(s) in which the module is taught	IV
Person responsible for the module	Framita Rahman, S.Kep.,Ns.,MSc
Lecturer	<ol style="list-style-type: none"> 1. Andi Masyitha Irwan S.Kep.,Ns.,MAN.,Ph.D 2. Syahrul Said, S.Kep.,Ns.,M.Kes.,Ph.D 3. Kusrini Kadar S, S.Kep.,Ns.,MN.,Ph.D 4. Wa Ode Nur Isnah Sabriyati S.Kep.,Ns.,M.Kes 5. Arnis Puspitha S.Kep.,Ns.,M.Kes 6. Nurhaya Nurdin, S.Kep.,Ns.,MN.,MPH 7. Silvia Malasari, S.Kep.,Ns.,MN
Language	Indonesian Language [Bahasa Indonesia]
Relation to Curriculum	This course is a compulsory course and offered in the 4 th semester.
Teaching methods	<p>Teaching methods used in this course are:</p> <ul style="list-style-type: none"> - Lecture (i.e., Small Group Discussion (SGD), video-based learning, SBL, role play) - Structured assignments (i.e., essays and reflective paper) - Field Observation <p>The class size for lecture is approximately 60 students and for the small group discussion/ group investigation is about 3-12 students for each lecturer. For field observation the students can up to 10 for each lecturer.</p> <p>Contact hours for lecture is 13.33 hours.</p>
Workload (incl. contact hours, self-study hours)	<p>For this course, students are required to meet a minimum of 90.67 hours in one semester, which consist of:</p> <ul style="list-style-type: none"> - 13.33 hours for lecture, - 16 hours for structured assignments, - 16 hours for private study, - 45.33 hours for field observation
Credit points	2 credit points (equivalent with 3.02 ECTS)
Recommend and Requirements prerequisites for joining the modul	Students must have attended all classes and submitted all class assignments before the deadline and final test. Students must have taken community nursing concept

Module objectives/intended learning outcomes	<p>After completing the course students will be:</p> <p>Knowledge: CLO1: Students will be able to examine basic concepts in public health and public health nursing; policy related to public health and to address public health problems in Indonesia; and trends and issues of public health nursing (K1).</p> <p>Attitude: CLO 2: Students will be able to formulate a nursing care plan for the community within a range of healthy diseases and in specific areas of community nursing, at least occupational health and school health which focus on health promotion and disease prevention (A)</p> <p>Competence: CLO3: Students will be able to have the competence to focus on nursing care plans on health promotion and disease prevention (C1) CLO4: Students will be able to design health education plans for common health problems in a community focus on health promotion and disease prevention (C4).</p>
Content	<p>Students will learn about:</p> <ol style="list-style-type: none"> 1. Introduction to Community Health and Basic Concepts of Community Nursing 2. Epidemiology and Population 3. Community as Client 4. Community Nursing Care 5. Programs/Policies in overcoming major health problems in Indonesia. 6. Issues and Trends in community service 7. Nursing Care in a specific area of Community Nursing
Examination forms	<p>Form of examination: Written exam: Multiple Choice Questions using Vignettes</p> <p>OSCE : case study</p>
Study and examination requirements	<p>Study and examination requirements:</p> <ul style="list-style-type: none"> - Students must attend 15 minutes before the class starts. - Students must switch off all electronic devices. - Students must inform the lecturer if they will not attend the class due to sickness, etc. - Students must submit all class assignments before the deadline. - Students must attend all the exams/tests to obtain final grade.

Example of Written Test Exam

1. 1. The nurse conducted an assessment in a village and obtained data that 45% of people suffer from hypertension. Villagers usually eat salty and high-sodium foods. The village is far from the Puskesmas and does not have active cadres. What is the nursing problem in this case?
 - a. Health care ineffectiveness
 - b. Ineffective health management
 - c. Community health deficiencies**
 - d. Readiness to improve health management.
 - e. Health behavior tends to be risky.
2. 2. A health center nurse conducts an assessment at an elementary school. When the study was carried out, it was found that the average child likes to snack carelessly. After further study, it was found that children rarely wash their hands before and after eating, rarely brush their teeth and take a bath once a day. What is the most appropriate action for the nurse to take?
 - a. PHBS counseling**
 - b. Screening for dental caries
 - c. Improved child nutrition
 - d. Promotion of healthy food and drink
 - e. Toothbrush training
3. HIV/AIDS counselors at the Puskesmas have distributed initial questionnaires and found data on the number of PLHIV from the Male Sex Group (MSM) who do not want to go to the Puskesmas. The counselor wanted to explore further the reasons for the MPL PLHIV not wanting to access Puskesmas services. What is the appropriate method the nurse can use?
 - a. Provision of follow-up questionnaires
 - b. Interview**
 - c. Counseling
 - d. Interviews
 - e. Focus Group Discussions
4. The results of a study in an RW found that the most common complaint was high blood pressure in the elderly. The cadre said "some elderly people don't see this as a problem and don't regulate their diet". What is the next study of the case?

- a. Data on elderly visits to the elderly posyandu
- b. Elderly health behavior questionnaire
- c. Cadres interview with elderly
- d. **Wildshield environmental survey RW**
- e. Physical assessment in the elderly
