

**Module Description: Pediatric Nursing - Chronic and Terminal Conditions
(21R01130302)**

Module designation	Course Module
Semester(s) in which the module is taught	V
Person responsible for the module	Dr.Kadek Ayu Erika, S.Kep.,Ns., M.Kes (Coordinator) Dr.Suni Hariati, S.Kep.,Ns., M.Kep Nur Fadhilah, S.Kep., Ns.,MN
Language	Bilingual, Bahasa Indonesia and English
Relation to Curriculum	This course is a compulsory course and offered in the 5 th semester.
Teaching Methods	Teaching methods used in this course are: <ul style="list-style-type: none"> - Lecture - Group presentation (Presentation, Discussion) - Small Group Discussion (SGD) - Case Study - Team-based project report <p>The class size for lecture is approximately 60 students.</p>
Workload (incl. contact hours, self-study hours)	Contact hours for lecture is 26,67 hours, assignments are 32 hours, and private study are 32 hours. For this course, students are required to meet a minimum of 90,67 hours in one semester, which consist of: <ul style="list-style-type: none"> - 26,67 hours (equals with 0.88 ECTS) for lecture, - 32 hours (equals with 1.06 ECTS) for structured assignments, - 32 hours (equals with 1.06 ECTS) for private study.
Credit points	2 credit points (equivalent with 3.02 ECTS)
Required and recommended prerequisites for joining the module	Students must have taken following courses: Pediatric nursing: healthy child and acut conditions
Module objectives/intended learning outcomes	After completing the course students will be: <p>Knowledge: CLO1: Explain the concepts and theories of children with chronic and terminal illnesses (K1)</p> <p>Competence: CLO2: Formulate a nursing care plan for children with chronic and terminal illnesses (C1)</p> <p>Attitude: CLO3: Provide nursing interventions for children with chronic and terminal illnesses, taking into account professional nursing ethics, legal considerations, cultural sensitivity, and the various age levels of children in the context of their families (A1)</p>

Content	<p>Students will learn about:</p> <ol style="list-style-type: none"> 1. Concepts and theories of children with chronic and terminal illnesses 2. Pathophysiology, pharmacology, and nursing care for children and families with body system disorders and their impact on meeting basic needs: <ol style="list-style-type: none"> a. Cardiovascular system: rheumatic fever b. Genitourinary System: NS, GNA, GNC, GGA, GGK c. Hematology System: Anemia, Leukemia, Thalassemia, ITP d. Immunology System: HIV AIDS, DHF, SLE e. Endocrine System: Juvenile DM, Hodkin disease f. Sensory System: retinoblastoma 3. Pathophysiology, pharmacology and nursing care for children and families with congenital abnormalities in various body systems and their impact on meeting basic needs: <ol style="list-style-type: none"> a. Cardiovascular system: ASD/VSD, PDA, TOF b. Digestive System: Hirschsprung's, atresia ani, atresia ductus hepaticus, labioschizis, or palatoschizis, esophageal atresia, hypertrophic pyloric stenosis c. Genitourinary System: Hypospadias/Epispadias, Wilms Tumor d. Musculoskeletal System: scoliosis, CTEV, CDH, osteosarcoma e. Neurological System: Cerebral Palsy 4. Nursing care for children with special needs: <ol style="list-style-type: none"> a. Mental retardation b. Down syndrome c. Autism d. ADHD e. Global Developmental Delay (GDD/MDD) and Speech delay 5. Perioperative care and nursing interventions for babies and children with chronic/terminal illness <ol style="list-style-type: none"> a. Giving chemotherapy b. Desferal administration c. Colostomy care and feeding of babies/children with labio and/or palatoschizitis d. Palliative care e. Health education for children and families 6. Ethical principles in nursing care for chronic and terminally ill children
Examination forms	Written test: Multiple Choice Questions
Study and examination requirements	<ul style="list-style-type: none"> - Students must attend 15 minutes before the class starts. - Students must inform the lecturer if they will not attend the class due to sickness, etc. - Students must submit all class assignments before the deadline. - Students must attend all classes of clinical skill laboratories. - Students must attend the exam to get final grade. - Students must get final mark minimum of 40
Reading list	<ol style="list-style-type: none"> 1. Beckmann, C. R. B., Ling, F. W., Barzansky, B. M., Herbert, W. N., Ball, J.W., Bindler, R.C., and Cowen, K.J., (2010). <i>Child Health Nursing. Example of Written Test Exam

1. A baby boy, 11 months old, was admitted to hospital with acute tonsillopharyngitis. Assessment results: reluctant to eat and drink, looks weak. Children like to scream, fuss, cry when the nurse comes to inject medicine. The child has not defecated for 2 days.

What is the baby's behavioral reaction shown in this case?

- a. Protest
- b. Hopeless
- c. Rejection
- d. Temper tantrum
- e. Not cooperative

2. A baby girl, 10 month old, was admitted to hospital with rheumatic fever. Assessment results: the child is weak, eats and drinks less, portions are not finished. The baby was fussy and cried loudly every time he saw officers wearing white clothes. The child has not defecated for 2 days.

Temperature 37.5 C.

What is the nursing intervention in this case?

- a. Engage children in developmentally appropriate activities
- b. Encourage parents to stay with the baby
- c. Encourage parents to visit or share a room
- d. Help children adapt appropriate behavior
- e. Talk about family members

3. Boy, 3 years old in the inpatient room with rheumatic fever. Assessment results: looks weak, lethargic, doesn't finish eating, lazy to drink. Mother always asks how her child is doing. The child is fussy, cries when the nurse comes to measure vital signs. The child has not defecated for 2 days.

What is the priority nursing problem in this case?

- a. Anxiety
- b. Hyperthermia
- c. Helplessness
- d. Activity intolerance
- e. Deficit self-care: toileting
